## CONTENTS

*Special Issue*: Theoretical Chemistry and Biology — A Collection of Invited Papers Dedicated to Professor Bernard Pullman on the Occasion of his 70th Birthday

Metals in biology: low-lying states of iron–oxygen and iron–sulfur complexes modeling electron transfer in redox reactions
I. Fischer-Hjalmars and H. Holmgren (Stockholm, Sweden) ..... 1
Asymmetric adsorption of ethyliminium cation on kaolinite and L-homochirality of amino acids in proteins
A. Julg and Y. Ozias (Marseille, France) ..... 17
Theoretical studies of transplantation antigens: predicted conformation and structure–function relationship of the murine MHC class I antigen H-2K$^b$
S. Fraga, L. Seijo, M. Campillo, F. Moscardo and B. Singh (Edmonton, Alberta, Canada) ..... 27
Correlated events in biochemistry
G. Careri (Rome, Italy) and J. Wyman (Boulder, CO, U.S.A.) ..... 41
Carcinogenicity of polycyclic aromatic hydrocarbons: a dialogue
J.P. Lowe (University Park, PA, U.S.A.) and B.D. Silverman (Yorktown Heights, NY, U.S.A.) ..... 47
Molecular mechanics and molecular shape. Part VI. The response of simple molecules to biomolecular association
A.Y. Meyer (Jerusalem, Israel) ..... 83
Kekulé count and algebraic structure count for unbranched alternant cata-fusenes
D.J. Klein, T.G. Schmalz (Galveston, TX, U.S.A.), S. El-Basil, M. Randić (Athens, GA, U.S.A) and N. Trinajstić (Croatia, Yugoslavia) ..... 99
Major groove recognition of DNA-base sequences by regulatory proteins and drugs
V. Kothekar, A. Kotwal, B. Chandrasekhar and Mrigank (New Delhi, India) ..... 109
Interaction of distamycin-oligopeptides with the self-complementary (d-CACAAGCTTGTG)$_2$ duplex in solution
G. Luck, C. Zimmer, K.D. Weller, H. Schütz, R. Weiss, E. Birch-Hirschfeld (Jena, G.D.R.) and W. Guschlbauer (Gif-sur-Yvette, France) ..... 121
Application of adiabatic theory of vibrational predissociation to T-shaped triatomic van der Waals' molecules
T. Kokubo, Y. Fujimura (Sendai, Japan) and T. Nakajima (Koriyama, Japan) ..... 135
A molecular orbital study of a model of the $Mg^{2+}$ coordination complex of the self splicing reaction of ribosomal RNA
M. McCourt, M. Shibata, J.W. McIver, Jr., and R. Rein (Buffalo, NY, U.S.A.) ..... 145
Calculation of proton transfers in hydrogen bonding interactions with semi-emipirical MNDO/H
A. Goldblum (Jerusalem, Israel) ..... 153
An approach to biomolecular electronics and bioengineering based on coenzymes chained to solid supports
G. Govil, R.S. Phadke and H.M. Sonawat (Bombay, India) ..... 165
Effects of electron correlation upon molecular interactions: correction of the electrostatic interaction between DNA bases
M.M. Szczęśniak, S. Scheiner (Carbondale, IL, U.S.A.) and P. Hobza (Prague, Czechoslovakia) ..... 177
Quantum and experimental conformational analysis of model molecules related to collagenic structures
D. Vasilescu, D. Cabrol (Nice, France) and A.M. Tamburro (Padova, Italy) ..... 185

Molecular orbital studies on nucleoside antibiotics. Part IX. Conformation of 5-ethynyl- and 5-vinyl-2′-deoxycytidines
A. Saran (Bombay, India) ..... 215
Spectroscopic properties of large molecules in the Frenkel exciton approximation
J. Avery (Copenhagen, Denmark) ..... 225
A theoretical approach to dehydrodimerization reactions
G. Leroy and M. Sana (Louvain-la-Neuve, Belgium) ..... 237
Interactions between bio(macro)molecules: models and methods
F. Achenbach and R. Zahradník (Prague, Czechoslovakia) ..... 249
Models and modeling in theoretical chemistry
J. Tomasi (Pisa, Italy) ..... 273
Electric fields around molecules
G.G. Hall and C.M. Smith (Kyoto, Japan) ..... 293
Are intermediate electronic states responsible for pyroelectric luminescence?
G. Biczó (Budapest, Hungary) ..... 305
Novel base pairing in nucleic acids: C–H donor group mediated base pairing involving 3-methyluracil
R.L. Ornstein (Princeton, NJ, U.S.A.) ..... 311
A comparison of QSARs proposed for the inhibition of dihydropteroate synthase by substituted 4-aminodiphenylsulfones
M.G. Koehler, A.J. Hopfinger (Chicago, IL, U.S.A.) and J.K. Seydel (Borstel, F.R.G.) ..... 319
Structure and free energy of complex thermodynamic systems
Z. Li and H.A. Scheraga (Ithaca, NY, U.S.A.) ..... 333
The extended polarizable continuum model for calculation of solvent effects
S. Miertuš, V. Frecer and M. Májeková (Bratislava, Czechoslovakia) ..... 353
Sequence-dependent effects in A-DNA double helices
T.E. Haran and Z. Shakked (Rehovot, Israel) ..... 367
On the restricted Hartree–Fock description of oligomer chains with expected metallic character
J.-M. André, J. Delhalle, J.G. Fripiat, G. Hennico (Namur, Belgium), J.-L. Calais (Uppsala, Sweden) and L. Piela (Warsaw, Poland) ..... 393
Electronic structure and bonding of transition metal complexes MCO (M=Cu, Fe, Ti)
G. Berthier (Paris, France), A. Daoudi and M. Suard (Palaiseau, France) ..... 407
Orbital interactions in large molecular systems: adsorption of $H_2$ on Ni surfaces
H. Fujimoto, H. Kawamura, T. Ichiishi and K. Fukui (Kyoto, Japan) ..... 417
A theoretical study on the hydration of B- and Z-DNA double helices
M.Y. Song, S. Kim and M.S. Jhon (Seoul, Korea) ..... 427
An examination of some effects of OH rotation in phenol and *p*-nitrophenol
P. Politzer and N. Sukumar (New Orleans, LA, U.S.A.) ..... 439
Ab initio molecular orbital study on the pairing and stacking interactions between nucleic acid bases in relation to the biological activities
C. Nagata and M. Aida (Tokyo, Japan) ..... 451
A molecular dynamics study of chloride binding by the cryptand SC24
B. Owenson, R.D. Macelroy (Moffett Field, CA, U.S.A.) and A. Pohorille (Berkeley, CA, U.S.A.) ..... 467

*Author index* ..... 485

*Subject index* ..... 487
